## INFORMATION TECHNOLOGY

During March, the IT team installed a cradle point wireless router at the Wrightsville Unit to assist in the bandwidth issues experienced by the facility during video conferencing.

IT replaced the audio equipment in the Cummins execution chamber this month with a new amplifier, microphone, speakers, and all new wiring. The old equipment had poor audio quality and was no longer transmitting properly to the farm office. The new equipment is configured to operate in the same manner as before.

EOMIS development for the Administrative Office of Courts interface has progressed with web service development and testing.

Marquis is working on the drug court identifiers and mapping for the interface. AOC is revising the sentencing form to capture additional information needed by ADC and ACC in EOMIS.

The commissary committee has identified purchasing limits for commissary inventory items. Due to the large amount of inventory, Unit Commissary Staff will be responsible for updating its facility limits on existing inventory items in EOMIS. The commissary representative in inmate banking will apply limits to new inventory items.

The ACIC FoxTalk interface with EOMIS requires an update to add encryption due to the hosting of the FoxTalk hardware switch outside the state network. ADC and ACC will share equally in the cost for the change.

A second team of Marquis Staff visited the Ouachita River and Varner Units to teach live correctional processes and the use of EOMIS. EOMIS staff assisted and also participated in the tour.

IT staff reviewed and discussed the new County Jail invoice process for Local Law Enforcement (LLE) and ADC with Procurement. Procurement will develop new material for training and reference for use by LLE.

Discussion continues on the School District EOMIS development project focusing on automation of class attendance documentation. The project has changed from an expensive time clock solution to a tablet product. The tablet product can be wall mounted and includes badge-scanning capabilities. The final product must interface with EOMIS to accept the inmate ID card information.
